SAFESCAN 4400

ELECTRIC CASH DRAWER

WITH RJ-11 INTERFACE

Are you looking for an electric, competitively priced cash drawer? With the Safescan 4400 you will have a solid drawer that can hold a large amount of money. This cash drawer forms an integral part of your existing system and cannot be opened manually. The Safescan 4400 has four compartments for notes, which are equipped with pressure springs that work perfectly. And with the eight trays for coins you have plenty of possibilities to arrange your POS. The separation option for large denominations, which can be put into the slot at the front, is practical and safe. The notes will then be stored – out of sight – underneath the removable coin trays. The inner tray of the 4400 can also be integrally and entirely removed.

- Can be connected to existing system
- 8 removable coin trays
- 4 compartments for notes
- Adjustable compartments for coins and banknotes
- 1 media slot for separating large denominations
- With RJ-11 interface 12-24V

SAFESCAN 4400
